

CODE NAME

DYEL

Train together. Correct in real time.

Seed round pitch — LZ Studios

THE PROBLEM

Fitness runs on tools that don't talk to each other

The feedback loop is broken

Coaches find out weeks later whether a plan was even followed.

Form errors go uncorrected

Injuries trace back to posture mistakes nobody caught in the moment.

Coaches drown in spreadsheets

Excel and DMs don't scale past a handful of clients.

Every solution is a fragment

Pose apps, trackers, and marketplaces each solve one slice.

No oversight layer exists

Gyms, schools, and parents have no visibility into sessions.

0%

of today's fitness apps combine real-time coaching, universal pose AI, org oversight, and privacy.

THE GAP

The big players solve one piece.
None solve the whole loop.

	DYEL	Trainerize	TrueCoach	WHOOB	CoachNow

Universal Pose AI	✓	✗	✗	✗	✗
Org Oversight	✓	✗	✗	✗	✗
Privacy-First Design	✓	✗	✗	✗	✗
Gym Mapping	✓	✗	✗	✗	✗

No product links real-time coaching, universal pose AI, wearable context, and organizational oversight into a single athlete profile.

WHY NOW?

The infrastructure is finally ready

AI is cheap and accessible

Pose-estimation models are open-source and production-ready.

Wearables are everywhere

Apple Watch, WHOOP, Garmin — the data layer already exists.

Remote coaching is normalized

The post-COVID shift made online coaching the default, not the exception.

The market is fragmented

\$100B+ in fitness with no dominant operating system.

Network effects are untapped

No platform has yet linked athletes, coaches, and orgs into one graph.

**We're not early.
We're not late.**

We're exactly on time.

Six pillars, one platform

P2P Coach ↔ Athlete

Verified coaches, instant matching, live sync.

Universal Pose AI

Real-time form correction across all sports.

AI Coaching Videos

Multilingual, matched to your body and strength.

Gym Nomad

Scan a gym once — your workout auto-calibrates.

Adaptive Programming

Plans built around your injuries, goals, and time.

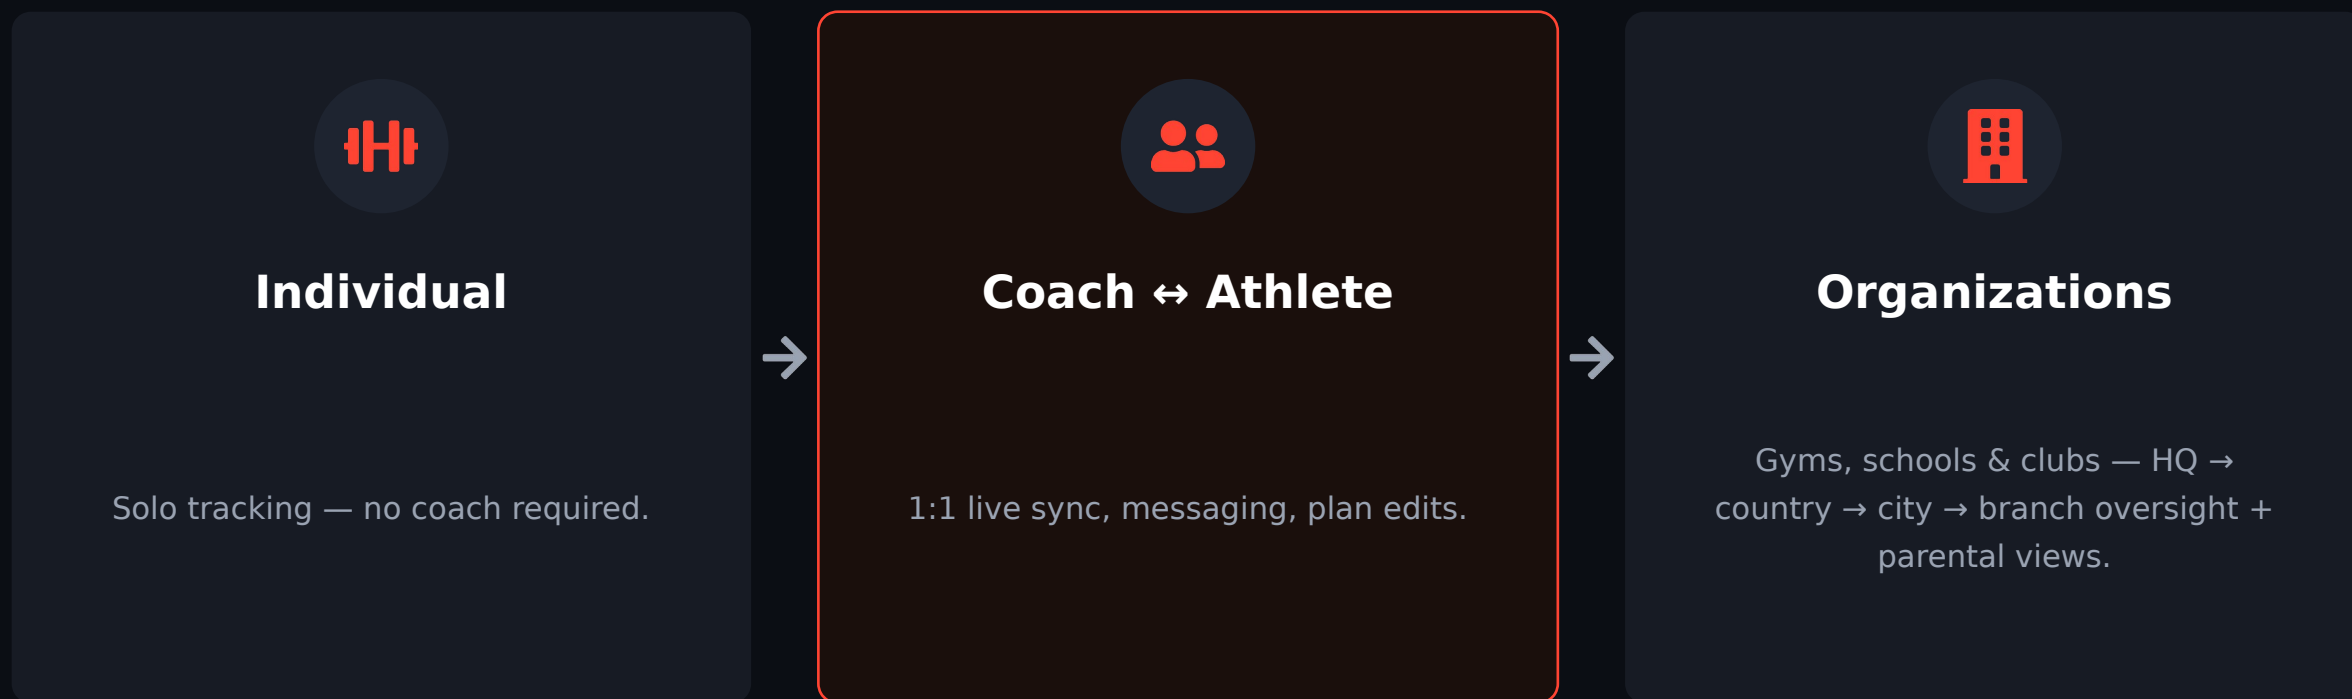

Privacy-First by Design

Face blurring, nicknames, full permission control.

THE LAYERS

Built to scale from a single workout to an entire organization

PROGRESS

Already in motion — before a dollar of funding

Architecture underway

Backend more than 50% complete.

AI testing live

Pose estimation tested on real gymnastics movement.

Founder-market fit

We train and compete in the sports we're building for.

Ready to adopt, immediately

Palm Hills Club and Gezira Club said yes — representing:

5,000+ athletes

200+ coaches

*Every coach surveyed said they'd replace their
spreadsheets.*

VALIDATION

We've already been told yes — now we need to build it

Signed LOIs

Palm Hills Club and Gezira Club have both signed letters of intent to adopt DYEL platform-wide.

Universal coach buy-in

Every coach surveyed said they'd switch off Excel-based tracking for DYEL.

"We've already been told yes — now we need to build it."

MARKET SIZE

A large, fast-growing market —
fragmented and ready to consolidate

TAM

\$131B+

Global fitness industry (2025), growing to \$245B by 2032

SAM

\$47B+

Global personal training market (2025), growing to \$82B by 2034

SOM

Egypt & GCC

Independent coaches & multi-sport clubs, including our pilot partners

Four phases, free to paid

01

Free Launch

Release a free athlete tracker to build density.

02

Coach Invite

Athletes invite coaches — viral, bottom-up adoption.

03

Org Gateways

Clubs and gyms adopt organization-wide.

04

Paid Conversion

Premium features unlock once value is proven.

Pilot Partners

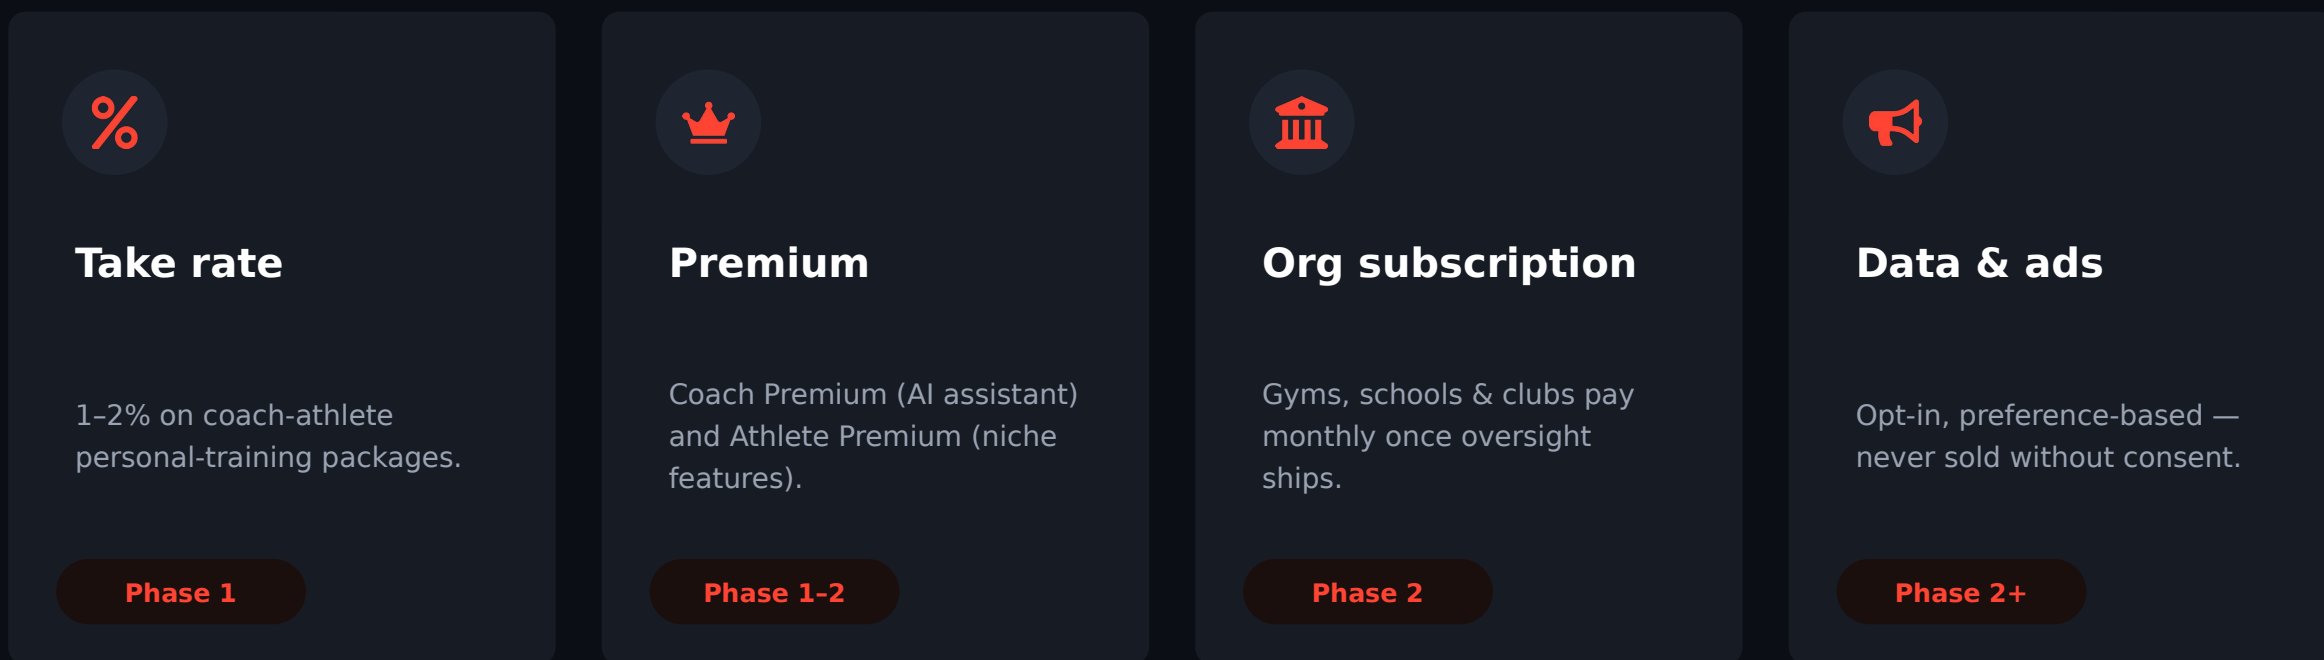

Palm Hills Club & Gezira Club — signed and ready.

Marketing Channels

TikTok/Insta coach testimonials, athlete referrals, and free 12-month org subscriptions for early adopters.

REVENUE MODEL

Four revenue lines, each unlocked in the right phase

Priced low at launch — the take rate starts at 1-2% to out-compete off-platform payments and build trust first.

ROADMAP

A scoped, phased build — not a wishlist shipped at once

01

Phase 1 — Core App

P2P registration & matching, AI-assisted workout creation, pose estimation v1, multilingual coaching videos, messaging, privacy & permissions.

02

Phase 2 — Organizations

Org layers for gyms/schools/clubs, nutritionists & rehab roles, in-app payments & trust layer, wearable + nutrition integration.

03

Phase 3 — AI Complete Haul

Generative pose-correction video, contact-angle analysis for ball & combat sports.

Phase 1 launches free to build network density before monetization begins.

Why this compounds instead of getting copied

Network Effects

More athletes means better coach matching for everyone.

Proprietary Pose Data

Every rep creates proprietary AI training data competitors don't have.

First-Mover in Gym Mapping

Each gym scan becomes a persistent, reusable asset.

Org Lock-In

Once an organization onboards, they don't switch.

Privacy Trust

Built-in privacy features create user trust competitors can't easily copy.

TEAM

Builders who live in both worlds — code and the gym floor

Mohamed El-Shayeb

CEO / Co-Founder

14 years as a software engineer across fintech, brokerage and banking. Competitive powerlifter and strength coach. Leads product & engineering.

✉ m@lzstudios.fit

Omar Al Barahamtoshey

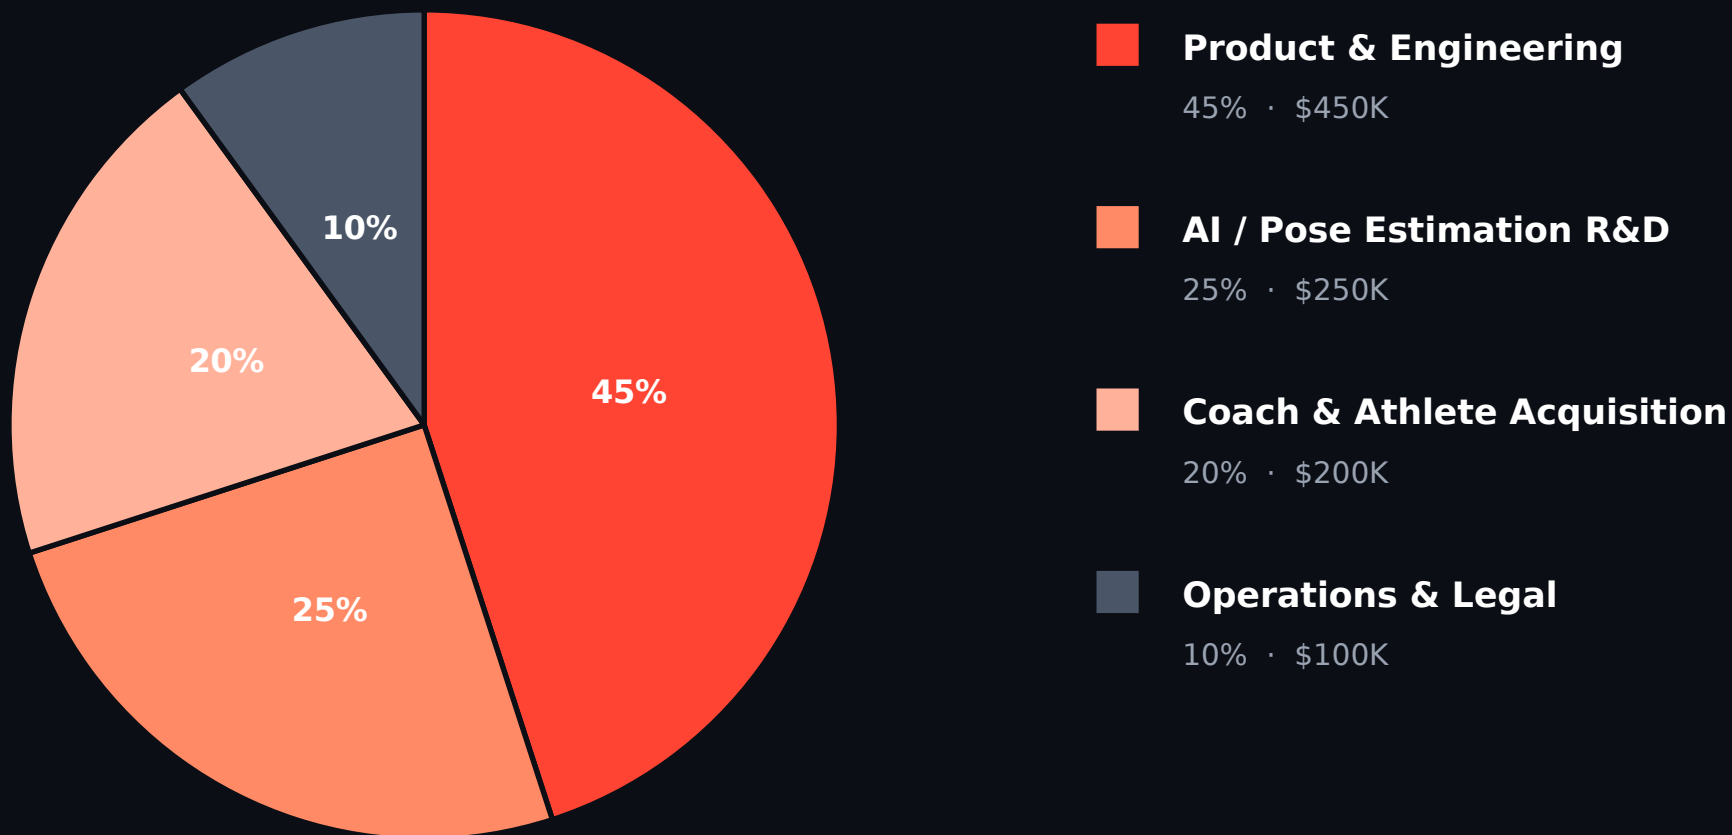

Co-Founder / AI Lead

AI / computer-vision engineer of 4 years, including market-prediction models. Competitive powerlifter with deep interest in gymnastics and pose estimation. Leads the AI/CV roadmap.

✉ o@lzstudios.fit

USE OF FUNDS

\$1M, allocated with intent

Suggested allocation — open to shaping this with our lead investor.

DYEL

Let's build the real-time network athletes
and coaches actually need.

"Raising our Phase 1 seed round."
